How Martial Arts Has Helped My Sports Career by Joey Zaino

What I enjoy the most about the martial arts is the fact that it has made my family close always traveling together to perform our shows. I will always be grateful to my Dad who has given me a talent for life through the martial arts which I truly believe is the reason for my success in whatever sport I may play or participate in.

Growing up in sports has been my whole life and no matter what I am involved in sports seems to come naturally to me. Like my brother Tony and sister Dominique I have been studying martial arts since I was 3 years old and I believe it has helped me with my involvement in my foot ball and basket ball school career.

With foot ball I have been playing since the age of 9 starting off with the Jupiter - Tequesta Athletic Association where I live. With basket ball it was a different story. I discovered my love for the game hanging around friends who played and my skills came self taught by hours of playing in the back of my house. Making the Jupiter Middle School 12 man squad was a big accomplishment for me since I had never played for a team before and the fact that 116 boys tried out, a record for the history of the school. The coach at Jupiter High School was skeptical about having me try out since he knew I played foot ball and even told me that few have talent for both. When I tried out for the team to his surprise I qualified for the Freshman 10 man squad out of 50 boys. I played first string most of the year and than qualified for a scholarship to play on the Jupiter - Tequesta Athletic Association travel team. I now play on the JV JHS squad and also made the Varsity Football team this year even though I am a sophomore.
